EDUCATION & CERTIFICATIONS

Northeastern University — Oakland, CA
Bachelor of Science in Computer Science — Expected May 2030

SANS Technology Institute — Virtual
SANS Cyber Academy (GFACT, GSEC, GCIH Certifications) — January 2026 – July 2026

SKILLS

Security Analysis: Incident response, log analysis, alert triage, malware analysis, vulnerability management
SIEM & Monitoring: Splunk, SentinelOne, Elastic Stack, Windows Event Logs
Networking & Systems: TCP/IP, DNS, HTTP/HTTPS, Linux (Ubuntu, Debian, Kali), Windows 10/11
Programming: Python, PowerShell, Bash, Java, C

CYBER PROJECTS & ENGAGEMENT

WiCyS x SentinelOne: ThreatOps CTF — **November 2026**

- Solved 33 of 40 challenges and ranked 12th out of 70+ competitors in a timed threat hunting challenge.
- Queried SentinelOne Data Lake and correlated endpoint, threat, and event telemetry to uncover malicious activity and validate findings.

CodePath Intermediate Cybersecurity Course — **September 2026 – Present**

- Investigated 14 simulated incidents involving business email compromise, brute-force attacks, and directory traversal exploitation, uncovering indicators of compromise.
- Leveraged Splunk to correlate security telemetry across multiple event sources, identify compromised assets, reconstruct attack activity, and assess organizational impact.
- Authored incident analysis reports detailing attack indicators, affected systems, root causes, and mitigation recommendations based on investigative findings.

SANS Cyber Academy — **January 2026 – July 2026**

- Conducted 60+ hands-on security investigations across Windows, Linux, and enterprise networks, detecting and responding to simulated cyber attacks.
- Analyzed network traffic, logs, and system artifacts using Wireshark, Tcpdump, and Sysinternals to identify indicators of compromise, attacker persistence, and unauthorized activity.
- Performed malware remediation, system hardening, and vulnerability mitigation to restore compromised systems and prevent recurring attacks.

MBASED: Binary Ninja Plugin — **July 2024**

- Developed a Python-based Binary Ninja plugin to automate simplification of obfuscated C programs, reducing manual reverse-engineering time and improving analysis consistency.
- Co-authored IEEE Xplore publication and presented research on program deobfuscation at MIT URTC.

EXPERIENCE

Northeastern University Mills Institute — **October 2026 – Present**
Student Assistant — Oakland, CA

- Managed datasets tracking event participation, program spending, and attendee information across 8+ student programs, enabling accurate reporting and informed program planning.
- Designed and administered 10+ Qualtrics surveys and reports, streamlining data collection and standardizing reporting workflows through documentation, templates, and user guides.

Somerset Hills YMCA — **July 2026 – August 2026**
Administrative Intern — Basking Ridge, NJ

- Coordinated scheduling, member outreach, and administrative support for 50+ personal training programs, supporting daily operations and client communication.
- Developed and maintained Excel tracking systems for budgeting, attendance, inventory management, and operational reporting, ensuring accurate data tracking across program operations.
